

Training approach #3: Playing out positions against an engine at a rapid time control (for example 15 minutes + 10 seconds increment)

Assumptions

1. You are using Chessbase Fritz 17
2. You have a working installation of one chess engine.
3. You have a pgn file of the game you wish to play out

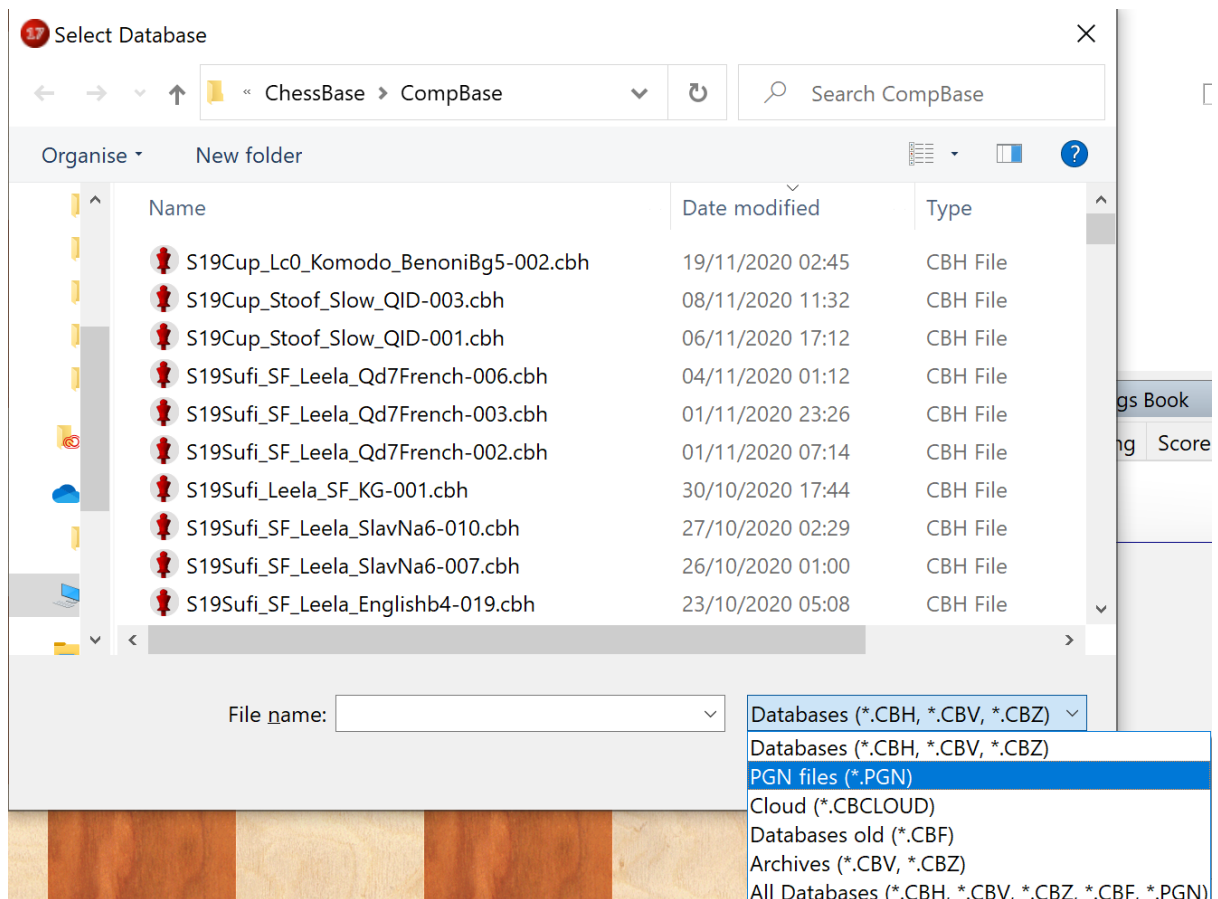

Step-by-step

A. Start Chessbase Fritz 17 in Classic Mode

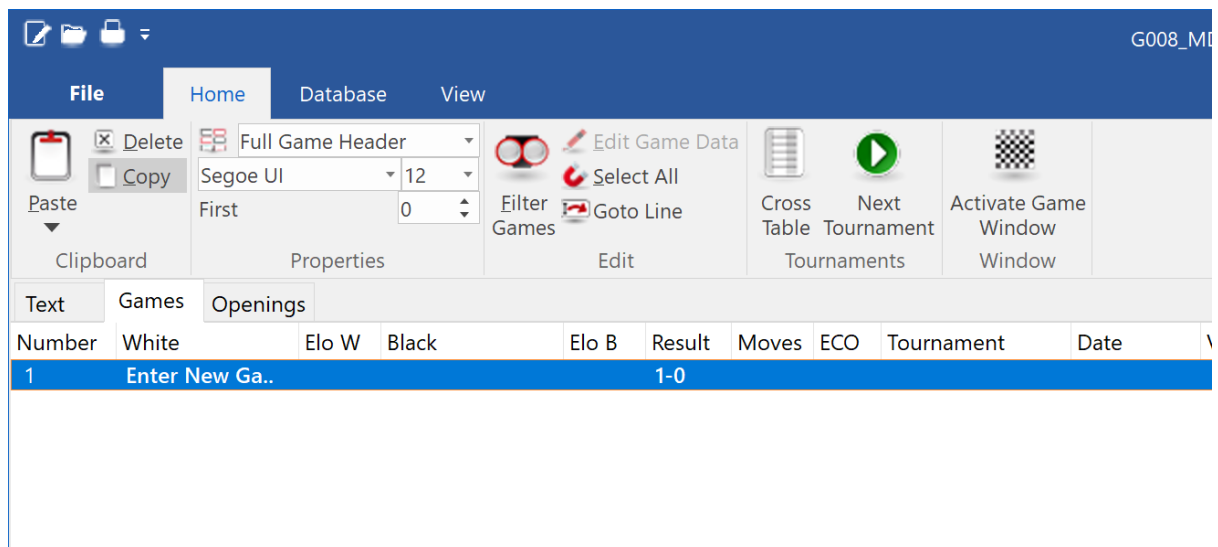

1. Start Fritz 17

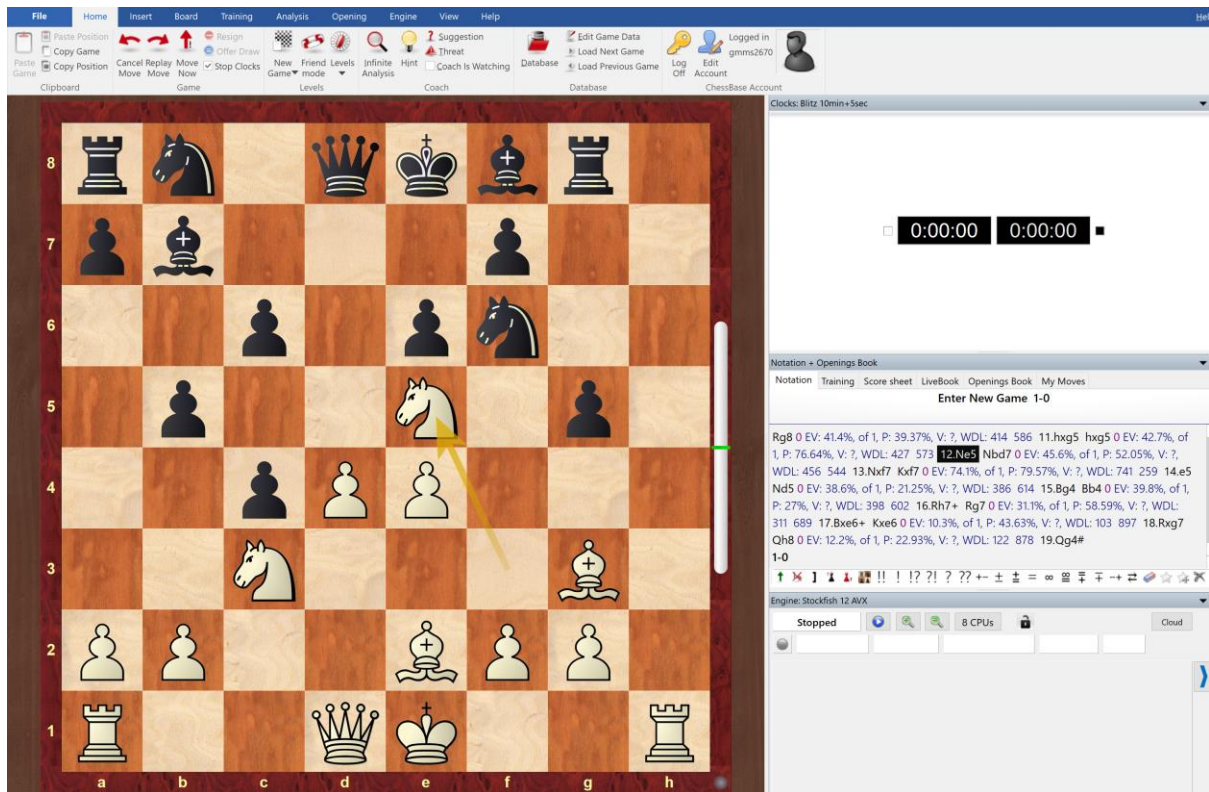

2. From the initial menu, choose Classic Menu.
3. Click on New Game
4. Click on File | Open | Database | Other
5. Put the dropdown menu for file extensions to all databases

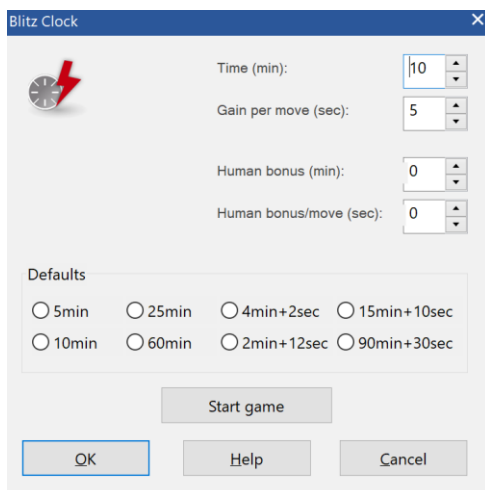

6. Browse to where you put your pgn file and click Open.
7. Double click on the game displayed in the database window

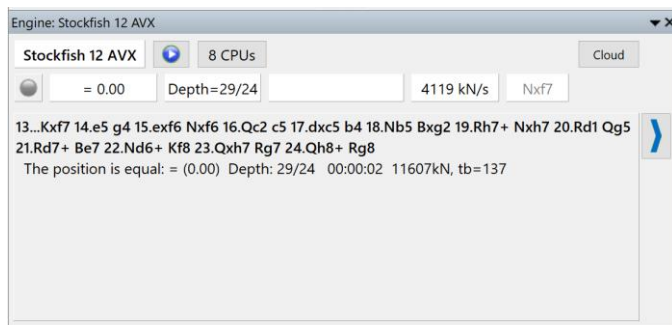

8. Select the move you want to play the game out from

9. Click on Levels, choose Blitz Game
10. Set the time control as you desire. I normally choose 10 minutes + 5 seconds increment or 15 minutes + 10 seconds increment.

11. Click on OK
12. Click on Move Now. If you want to turn off the engine analysis, Click on the X on the right of the window

13. Enjoy your game!
